

ENVIRONMENTAL MANAGEMENT PLAN 2025

Rally di Roma Capitale

International motorsport, territorial identity, and strategic sustainability

Established in 2013, the Rally di Roma Capitale has rapidly evolved into one of the most prestigious and strategically positioned events on the European motorsport calendar.

Today, it holds the rare distinction of being the only event simultaneously valid for both the FIA European Rally Championship (ERC) and the Italian Absolute Rally Championship (CIAR Sparco).

This dual recognition reflects the rally's growing international relevance, its rigorous organizational standards, and its capacity to merge sporting excellence with cultural and territorial valorization. Each edition draws a diverse range of crews from across the globe, along with institutional stakeholders, media networks, and tens of thousands of spectators.

What sets Rally di Roma Capitale apart is its ability to act as a catalyst for tourism, regional promotion, and sustainable innovation.

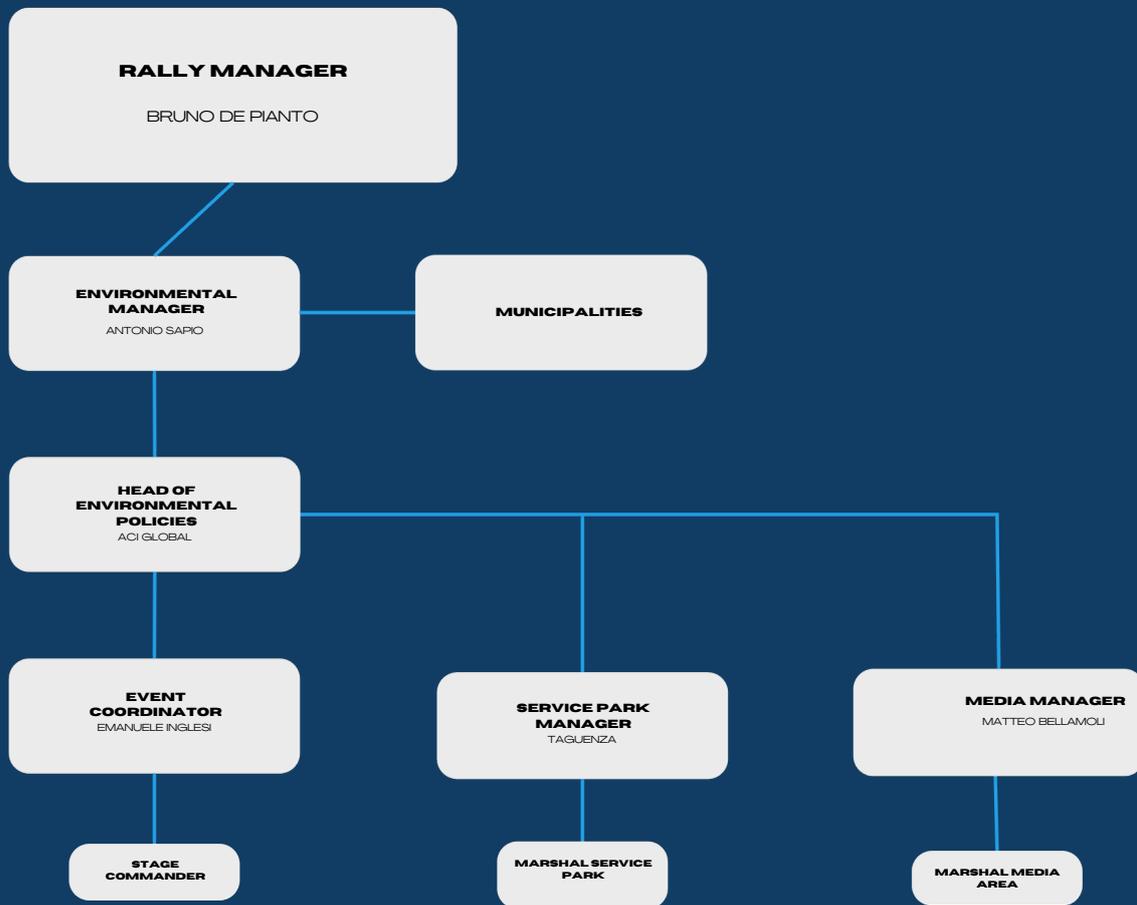

The competition unfolds along a route of over 1,000 km, traversing historical towns, archaeological landmarks, and panoramic landscapes throughout Lazio. The ceremonial start, set against the backdrop of the Colosseum in the heart of Rome, offers one of the most visually compelling and symbolically rich opening scenarios in world motorsport.

Throughout its organizational framework, the rally promotes sustainable logistics, social impact, and territorial cohesion. Motorsport Italia, the event organizer, applies an integrated management model that aligns with contemporary standards for environmental responsibility, safety, and stakeholder engagement.

Far beyond a traditional motorsport event, the Rally di Roma Capitale represents a multifaceted platform—combining international competition, local development, cultural dialogue, and institutional visibility. It stands as a powerful example of how sport, when strategically positioned, can become a vehicle for economic growth, global outreach, and civic pride.

ENVIRONMENTAL MANAGEMENT COMMUNICATION PROGRAM

Objective

Our goal is to share environmental values within the motorsport community, fostering a culture of sustainability. By increasing awareness and enhancing the skills of all stakeholders, we aim to improve environmental management practices and establish motorsport as a platform for positive environmental change.

Strategy

We are committed to leveraging every communication channel to disseminate our green values and principles. This approach emphasizes collaboration, education, and shared social responsibility, ensuring that all participants, spectators, teams, sponsors, and local communities are informed, involved, and empowered to contribute.

PLAN 2025

The Rally di Roma Capitale 2025 stands out as a premier event in the motorsport scene, not only for the spectacular nature of its special stages and the involvement of thousands of enthusiasts but also for its continued and growing commitment to environmental sustainability.

In a global context where environmental respect remains an essential priority, the Rally di Roma Capitale aims to serve as a virtuous model once again, combining the adrenaline of competition with concrete and measurable initiatives in support of the ecosystem.

Values and Mission

Environmental Responsibility: The Rally di Roma Capitale 2025 is committed to further minimizing its environmental impact through concrete, measurable, and scalable actions.

Education and Awareness: A core objective remains educating the public and stakeholders on environmental respect, emphasizing the importance of responsible behavior even in the context of a high-energy sporting event.

Sustainable Innovation: Continued collaboration with strategic partners to develop and implement innovative, sustainable solutions in key areas such as transportation, waste management, and reforestation.

Main Objectives

Reducing the Environmental Impact of the Event: By further improving infrastructure, enhancing eco-friendly practices, and expanding the use of sustainable transportation solutions.

Raising Awareness Among the Public and Participants: Delivering clear, engaging, and impactful messages about environmental responsibility through targeted campaigns, educational sessions, and interactive activities.

Collaborating with Institutions and Local Partners: Strengthening partnerships to ensure that environmental initiatives create a tangible and lasting impact on the territory and its communities.

Expected Impact

- Direct involvement of thousands of people through awareness campaigns, educational events, and hands-on activities during the event.
- Noticeable reduction in waste production and further improvements in waste management practices across all rally zones.
- Reinforcement of the Rally di Roma Capitale's reputation as a benchmark event for environmental sustainability within the global motorsport landscape.

PLAN 2025

The Rally di Roma Capitale 2025 places even greater emphasis on sustainable transportation solutions to further reduce the event's environmental impact and to promote responsible mobility among participants, teams, and spectators.

Collaboration with ATAC and Cotral

Objectives

- Promote and facilitate the use of public transportation to access rally zones.
- Further reduce vehicle traffic and related CO₂ emissions during the event.
- Coordinate transportation for course marshals via public transit to minimize the environmental impact of operational travel.

PLAN 2025

PLAN 2025

The Rally di Roma Capitale 2025 continues to prioritize sustainable transportation solutions as a key strategy to reduce the event's environmental impact and to foster responsible mobility habits among participants and spectators alike.

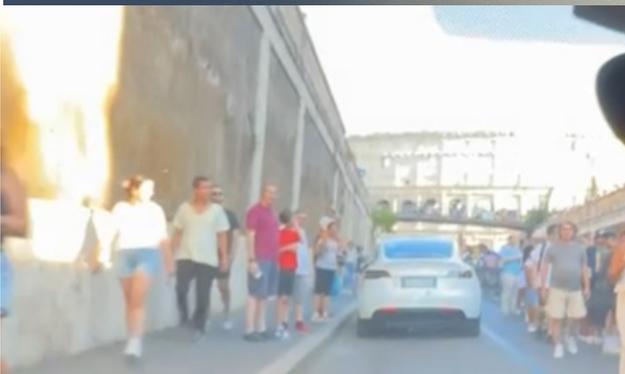

Promotion of Electric Taxis

Objectives

- Encourage the widespread use of electric mobility during the event.
- Reduce traffic congestion and the related CO₂ emissions.

Initiatives

- Partnership with local electric taxi companies to ensure efficient and eco-friendly transportation services during the event.
- Promotion of electric taxi use by rally drivers and staff for official transfers, showcasing a real-world example of sustainable mobility in action.
- Informational campaigns aimed at raising awareness about the environmental advantages of electric vehicles and encouraging their use beyond the event.

PLAN 2025

A key element of the Rally di Roma Capitale 2025 is its ongoing commitment to raising awareness among the public, participants, and staff about the importance of environmental responsibility. Through a series of targeted initiatives, the event continues to promote virtuous and conscious behaviors that extend well beyond the competition days.

Environmental Respect and Waste Management

Informative Campaigns:

- Production of updated promotional materials (flyers, posters, videos) to educate the public on avoiding littering in rally areas.
- Set-up of interactive information points featuring the rally's official mascot to raise awareness on proper waste sorting and disposal.
- Regular publication of articles and updates on environmental initiatives through the Rally's official website.
- Social media campaigns designed to engage the public and encourage active participation in sustainable actions throughout the event.

PLAN 2025

SERVICE PARK WASTE MANAGEMENT RULES:

Let's Go Green Together

Date: 09.07.2024 Time: 11:30 hrs
Subject: CoC Communication No. 1 Document No: 3.1
From: The Clerk of the Course
To: All competitors / Crew members / Team
Number of pages: 1 Attachments: 0 (0 pages)

IMPORTANT REMINDERS TO ALL COMPETITORS

- Waste Management:**
- C.O.C. is reminding to all competitors that Waste Management in service park needs to follow the attached scheme.
 - Together with Rally Material the organizer will provide to each competitor rubbish bags per each of the colour mentioned in the attached scheme.
 - Each waste container in SP has a sticker with the category of waste allowed in there.
 - For Dangerous waste (Oil, Battery, paper dirty of Oil etc.) will be created a special area closed by fences. To access this area, service park Manager Mr. Tangenza +39.333.9461768, must be contacted.
 - Waste management in service park will be monitored by Marshals with Green Tabar.
 - As per art 2.10 of RDRC SR CoC will apply financial penalty up to 500,00€ for not respecting the above rules.

WASTE MANAGEMENT WASTE COLLECTION PROCEDURE AT THE SERVICE PARK

The Organizer have given to competitors a set composed by 8 bags with different colors or colored adhesive band according to the kind of waste, as per the table here below:

WASTE	COLOR OF BIN OR ADHESIVE BAND
GLASS	GREEN
PLASTIC	ORANGE
PAPER	BLUE
ORGANIC	BLACK
HAZARDOUS WASTE	RED
HAZARDOUS WASTE	WHITE
HAZARDOUS WASTE	PURPLE
PAPER AND CARDBOARD	YELLOW
BATTERIES	ORANGE
GLASS	GREEN

SERVICE PARK FACILITIES

The organizing committee of the Rally di Roma Capitale is pleased to announce that an agreement has been reached to appoint an official catering service for the event.

The catering service will be available within the service park and will offer its services to the participants.

The agreement stipulates the preferential use of local km 0 products, plastic-free or eco-sustainable packaging, and certified waste disposal. Additionally, all necessary measures will be taken to maximize water and electricity savings.

We believe that environmental respect can be achieved through simple methodologies, and at the Rally di Roma Capitale, we are aware that good practices are essential to achieve important results for both us and the environment.

To contact the catering service please use the following email address:
areasteventi@gmail.com

ENVIRONMENTAL POLICY DEMANDS

With the aim of being less impacting as possible with the natural environment we are remind you that we need your help to save energy at service park. Saving energy at work is beneficial for the environment and promote sustainability. Here are best practices to save energy at service park:

- Switch off lights and equipment when not in use:** Encourage employees to turn off lights, computers, monitors, printers, and other equipment when leaving their desks or at the end of the workday.
- Use energy-efficient lighting:** Replace traditional incandescent bulbs with energy-efficient LED bulbs, which consume less energy and last longer.
- Utilize natural light:** Where possible, arrange workspaces to take advantage of natural light, reducing the need for artificial lighting during daylight hours.
- Optimize heating and cooling:** Set thermostats at appropriate temperatures and encourage employees to dress comfortably for the season to avoid overuse of heating and cooling systems.
- Maintain HVAC systems:** Regularly inspect and maintain heating, ventilation, and air conditioning (HVAC) systems to ensure they are running efficiently.
- Power management for computers:** Enable power-saving features on computers and set them to sleep or hibernate when not in use for extended periods.
- Unplug chargers and adapters:** Advise employees to unplug chargers, adapters, and other electronic devices when they are fully charged or not in use.
- Implement energy-efficient office equipment:** Invest in energy-efficient office equipment, such as ENERGY STAR-rated computers, printers, and copiers.
- Educate and involve team members:** Raise awareness about energy-saving practices and encourage employees to share their ideas and suggestions for further energy conservation.

Remember, sustainable energy practices require ongoing commitment and collaboration from everyone in the workplace. By adopting these best practices, your organization can make a positive impact on both the environment and its bottom line.

The Clerk of the Course
Mauro Zambelli

ENVIRONMENTAL POLICY

We at Rally di Roma Capitale are trying to achieve important milestone on our Environmental Policy, and to do so we need the collaborations of all the Teams and Crews.

As you all know conserving water in Service Park is essential to minimize waste and promote sustainable water usage.

As organizers we would like to suggest you the best practices to save water at your workplace:

- Educate Team Members:** Raise awareness among employees about the importance of water conservation. Encourage them to report any water-related issues and provide tips on how to save water in their daily activities.
- Set an example:** People learn by observing leaders. Be a role model by following water-saving rules yourself.
 - Be mindful of the hose:** Teach Team Members not to leave hose running when they're not using it water actively. Turn it off when done.
 - If you have dishwasher in your catering only run with full loads:** It's more efficient to wait until there's a full load before running the washing machine or dishwasher.
 - Don't Wash any Spare Parts or Car in the Service area:** Brief your team members on the fact the washing parts or cars in service area is forbidden.

By following these water-saving practices, your Team can contribute to water conservation efforts and reduce its environmental impact

The Clerk of the Course
Mauro Zambelli

PLAN 2025

A fundamental aspect of the Rally di Roma Capitale 2025 is the continued focus on responsible waste management. Through its ongoing collaboration with Diodoro Ecologia, the event strives to further minimize its environmental footprint and promote virtuous behaviors among spectators, participants, and staff

Waste Collection Areas:

- Installation and strategic placement of containers for waste sorting in spectator zones, the service park, and along the special stages.

Objectives:

- Facilitate efficient waste sorting through the strategic and visible placement of containers in key event areas.

Initiatives:

- Identification of high-traffic and sensitive zones for optimized container placement.
- Briefings with staff to ensure proper coordination for the setup, monitoring, and management of collection areas.

Staff Training

Objectives:

- Educate all staff members on the importance of effective and responsible waste management.

Initiatives:

- Conduct dedicated briefings with catering teams, special stage setup crews, and service park personnel.
- Distribute clear, practical guidelines tailored to each role to ensure proper waste handling throughout the event.

Partnership with ACI Global for Environmental Emergency Management

Objectives:

- Guarantee a rapid and effective response in the event of environmental emergencies during the rally.
- Coordinate intervention strategies for waste and environmental risks in critical scenarios.

Initiatives:

- Organize specific briefings with ACI Global to define emergency protocols for special stages and service park areas.
- Provide necessary equipment and dedicated resources to handle any incidents that may impact the surrounding environment.

PLAN 2025

PLAN 2025

Post-Race Cleanup of Special Stages

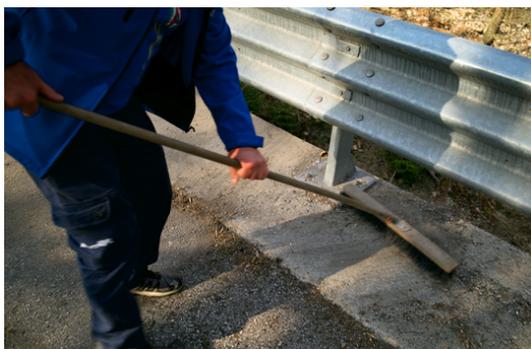

At the conclusion of each stage, the Rally di Roma Capitale 2025 remains firmly committed to the complete and timely cleanup of all special stages, with the goal of restoring natural conditions and safeguarding the surrounding environment.

Objectives:

- Ensure that every area involved in the event is left clean, waste-free, and environmentally intact.
- Reaffirm the rally's commitment to environmental stewardship and respect for the well-being of local communities.

Initiatives:

- Deployment of dedicated teams tasked with cleaning the special stages immediately following each competition.
- Systematic removal and proper disposal of all waste found along the routes and in designated spectator areas.
- Ongoing collaboration with local authorities to supervise cleanup efforts and ensure full compliance with environmental regulations.

PLAN 2025

Use of Electric and Hybrid Cars for Service Vehicles

The Rally di Roma Capitale 2025 reinforces its sustainability strategy by continuing to utilize electric and hybrid vehicles as official service cars throughout the event. This approach significantly contributes to reducing CO₂ emissions and promotes eco-conscious mobility solutions.

Objectives:

- Further reduce the environmental footprint of service and organizational vehicles during the event.
- Increase public and participant awareness of the benefits of adopting sustainable mobility technologies.

Initiatives:

- Continued exclusive use of electric and hybrid vehicles for all organizational transfers and logistical operations.
- Strengthened partnerships with manufacturers and providers of sustainable mobility solutions to ensure both performance and reliability.
- Promotion of electric mobility benefits through targeted communication campaigns and visual presence of vehicles during the event.

PLAN 2025

Use of the Mascot

Initiatives:

- Active participation in dedicated events and activities to engage children and families in a fun, accessible, and educational manner.
- Distribution of custom gadgets and informational materials to reinforce the values of environmental respect and sustainable behavior.
- Hands-on communication about recycling and waste sorting through interactive games and live demonstrations designed for younger audiences.

PLAN 2025

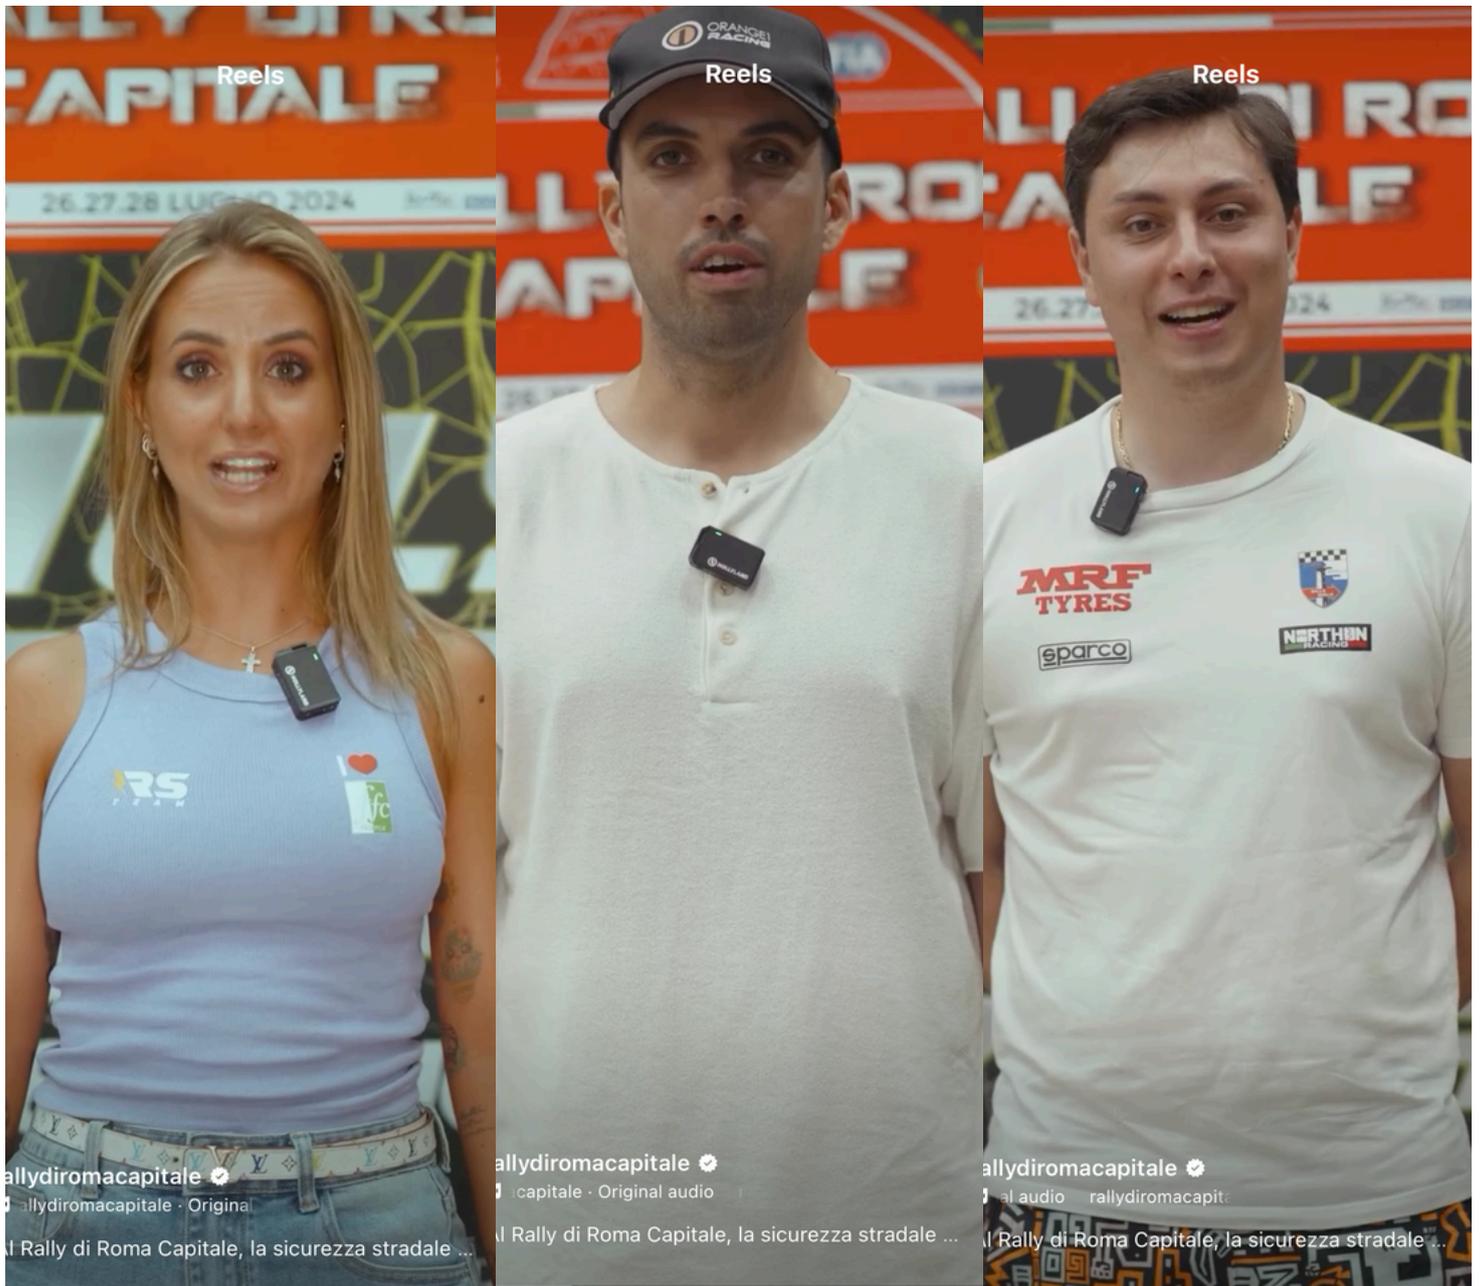

Driver Communications

Video Messages:

- Production of short video clips featuring drivers encouraging spectators to adopt environmentally responsible behavior during and after the event.
- Active involvement of drivers in spreading key sustainability messages through official channels and event platforms.

Awareness Events:

- Engagement of drivers in public-facing initiatives aimed at promoting sustainable habits and eco-friendly practices within the motorsport community and beyond.

PLAN 2025

The Rally di Roma Capitale 2025 continues to place strong emphasis on environmental education by actively engaging schools, staff, and spectators in targeted training programs and awareness initiatives.

School Engagement

Objectives:

- Educate young generations on the value of environmental respect, linking it to the world of motorsport.
- Encourage sustainable behaviors that can be applied in everyday life.

Initiatives:

- Organization of three dedicated educational sessions with students from local schools.
- Participation of the official rally mascot to make the sessions more engaging, interactive, and age-appropriate.
- Use of videos, hands-on demonstrations, and simplified educational materials to teach waste sorting and proper environmental practices.

Rally Staff Training

Objectives:

- Ensure that all personnel involved in the event are fully informed and aligned with the environmental protocols to be followed.

Initiatives:

- Delivery of two structured training sessions for marshals and technical staff.
- Deep dives into key topics such as waste separation, environmental emergency procedures, and strategies to minimize environmental impact.
- Distribution of practical operational guidelines to support sustainable management of all rally-related areas.

PLAN 2025

Initiatives for CO2 Reduction

The Rally di Roma Capitale 2025 strengthens its commitment to reducing environmental impact through targeted CO₂ offsetting projects and territory conservation efforts. This year's edition includes the planting of 120 trees in international projects and an increased number of local trees, actively contributing to both global and regional environmental protection.

Local Tree Planting

Objectives:

- Plant trees annually in local areas to support environmental regeneration. In 2025, 25 trees will be planted, each sequestering 150 kg of CO₂e per year—equating to a total of 3,750 kg of CO₂e offset annually.
- Create and expand green spaces that improve air quality and biodiversity within the region.

Initiatives Implemented:

- Active involvement of local communities in planting activities to deepen their connection with the land and raise environmental awareness.

International Tree Planting

Objectives:

- Offset the CO₂ emissions produced by the event.
- Support global reforestation and climate resilience projects.

Initiatives Implemented:

- In partnership with Tree-Nation, one tree will be planted for every registered crew. In 2025, 120 trees are planned across selected international projects, resulting in approximately 60,000 kg of CO₂e sequestered.
- Spectators and participants are encouraged to join the initiative via a dedicated online platform, further amplifying the rally's environmental impact.

Cosa ne pensano i piantatori

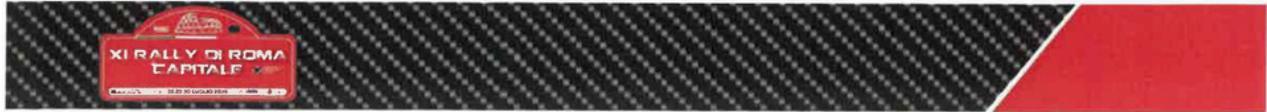

It is a fast-growing tree with multiple uses. Its main use is to act as a natural insecticide, so as long as there are neem trees in the field, the population will be safer from mosquito bites and its consequences such as Dengue. It provides a safer environment for the people and animals in rural areas. It is a tree that can survive in poor soils and extreme conditions. Neem is renowned for its medicinal properties. Various parts of the tree, such as the leaves, seeds, and bark, are used in traditional medicine for their anti-inflammatory, antimicrobial, and antiseptic effects.

Particolarità della specie

Fast-growing and long-lived evergreen tree. It occurs naturally in dry and thorn forests, and it grows in mixed forests. It's naturally distributed in Eastern Asia, in India, Bangladesh and Myanmar. Is a multipurpose tree, it is a very effective medicinal herb: it contains several medically active substances; provides food: fruits are eaten fresh or cooked, young leaves and flowers are eaten cooked as well; the tree bark contains tannins; timber; insecticide and repellent: the dried leaves are insect repellent; and many other uses.

PLAN 2025

“Il tuo atteggiamento fa la differenza”

“L’ambiente te ne sarà grato”

“Ci stiamo sforzando di attuare una politica consapevole e responsabile per ridurre al minimo l’impatto ambientale del Rally di Roma”

“Il tuo coinvolgimento è necessario per raggiungere gli obiettivi che ci siamo posti”

Siamo ospitati in aree di particolare pregio faunistico ed ambientale soggette ad elevato rischio boschivo, aiutateci a salvaguardare la loro Integrità.

“You can make the difference”

“The Environment will be grateful”

“We are trying to keep at a minimum the impact of the Rome Rally by adopting a responsible environmental policy”

“Your commitment is necessary to reach our goals.”

The Rome Rally takes place in an area of great environmental and wildlife value, subject to high fire risk. Please, help us protect the integrity of this site.

Previene gli Incendi

Fai attenzione a buttare le ceneri di sigarette in luoghi dove possono risultare una fonte di incendio. Un ottimo sistema per spegnere la sigaretta è quello di spegnerla in un bicchiere di acqua. Non parcheggiare mai il veicolo sulla vegetazione secca, indipendentemente da quale tipologia di veicoli usi. È importante essere consapevoli che il calore dallo scarico può causare l’innesco di un incendio.

Prevent fires

Dispose of cigarettes in places where they cannot be a source of ignition. Extinguishing cigarettes in water after use is a great way to prevent fires. Be mindful of the role vehicles can play in starting wildfires. Never park any type of vehicle on dry vegetation; the heat from the exhaust pipe can cause it to ignite.

Bevi acqua in bottiglie riutilizzabili
Drink water in reusable bottles

Risparmia l’acqua e fai attenzione a chiudere (bene) i rubinetti
Save water: turn off the tap

Raccogli in modo differenziato i rifiuti e smaltiscili nei rispettivi contenitori

Aiuta il riciclaggio dei rifiuti, utilizzando gli appositi contenitori che trovi nel parco assistenza. Utilizza idonei contenitori stagni per favorire la raccolta e lo smaltimento di materiali esausti (oli, fluidi, filtri, batterie, lampadine e materiali elettrici).

Sort your waste and dispose of it in the appropriate bins.
Help recycling of waste materials by using the appropriate containers located in the area of the event for the collection of oil, fluids, filters, batteries, light bulbs and electric materials.

Utilizza materiali biodegradabili e scegli borse riutilizzabili
I materiali biodegradabili e riutilizzabili sono più resistenti, economici e durevoli

Choose reusable bags and biodegradable materials
Biodegradable and reusable materials are resistant, cheap and long-lasting.

Riduci gli impatti ambientali utilizzando fonti di energia rinnovabili e mezzi di trasporto sostenibili, per quanto possibile

Save energy, turn to renewable energy sources, use sustainable means of transport

Dematerializza la documentazione cartacea rendendola disponibile on-line

Evita la stampa di migliaia di fogli di carta, altrimenti usa solo carta riciclata.
Avoid printing as much as possible. Prefer using recycled paper.
